

Mission-driven, Results-focused

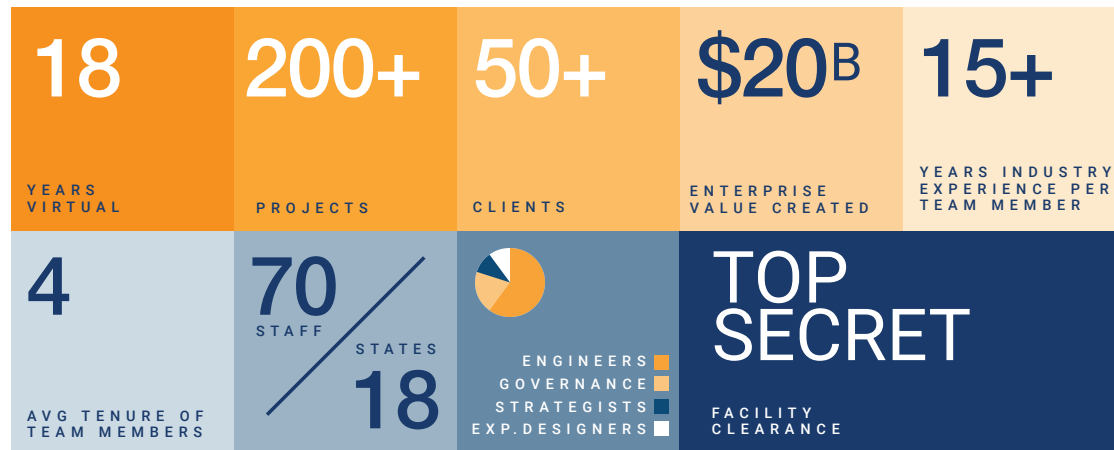

Over the last 15 years, our committed and experienced management team has solved some of the deepest and most complicated challenges facing the public sector. We bring commercial innovation into the world of government, but we understand the unique environment in which government operates.

When the best digital development is teamed with the strongest strategic vision, the results will transcend expectations – every time.

This is Intevity

Our services and solutions are designed to deliver on the promise of technology while reducing risk.

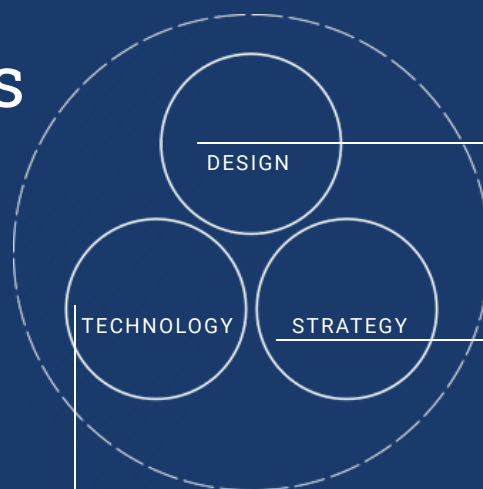

Understanding problems, building teams, and implementing solutions is the key to exponential growth.

Blending Disciplines Like Very Few Can

Intevity is a digital consultancy specializing in Customer Experience, Digital Product Development and Modernization solutions for both public and commercial sector clients.

We deploy senior, cross-functional teams and industry SME's that work hip-to-hip in the trenches to enable client teams and support the journey of effective digital transformation.

- Experience Strategy

Working As a Team of One

Intevity's public sector has worked with numerous government departments such as NASA, DOL, DOD, and others in empowering them to better fulfill their mission.

Our strength is seen in three places:

- [1] Our years of experience working with government agencies facing huge and pressing challenges
- [2] Technical expertise & innovation
- [3] Our ability to present what we see in a human, understandable and actionable way
